

Position in Graz, Austria

Our group at the Medical University of Graz, MUG, Department of Neurology, Austria, is looking for a student interested in pursuing a PhD project in the area of Neuroscience. We are particularly interested in understanding how functional and structural networks of the brain change during Alzheimer's disease progression and how these changes impact on cognition. All data (longitudinal) for the study are acquired. The fellow will join a collaboration project between the MUG und the Medical University of Leiden, Institute for Brain and Cognition (LIBC), The Netherlands, and the Institute of Psychology, Division of Methods and Statistics in Leiden, The Netherlands.

Requirements:

biostatistician or mathematician or a related discipline (e.g. psychology with focus statistics)
experience in analysing neuroimaging data preferred
experience with FSL, R and SPSS preferred
solid communication and writing skills

Closing date: September 15th, 2016

Contract length: 3 years (Approved by the Austrian Science Fund)

Institution:

Medical University of Graz
Department of Neurology
Division of Neurogeriatrics
